SENIOR ANGULAR FRONTEND DEVELOPER

Portfolio: <https://niranjana-abathurai-portfolio.netlify.app/>

PROFESSIONAL SUMMARY

Senior Frontend Developer with over 6 years of experience engineering scalable, enterprise-level web applications using the modern Angular ecosystem (v8–20), TypeScript, and RxJS. Specialized in architecting high-performance applications from scratch using Angular 19/20, standalone components, and lazy-loading strategies. Proven track record in modernizing legacy codebases, implementing complex reactive workflows, and driving frontend innovation through AI-assisted development and Figma-to-code automation. Strong cross-functional background in Java, Spring, and MongoDB integration.

CORE COMPETENCIES

Angular 8–20, Angular 19/20, TypeScript, JavaScript, RxJS, Reactive Forms, Standalone Components, Angular Modules, Lazy Loading, Angular Services, REST API Integration, Angular Material, AG Grid, ngx-translate, SAP Spartacus, UI Development, Responsive Web Applications, Frontend Architecture, Performance Optimization, Authentication & Route Guards, HTTP Interceptors, Unit Testing, Jasmine & Karma, Java/Spring, MongoDB, CI/CD, AI-Assisted Development, Figma-to-Code Automation

AI & FRONTEND INNOVATION

- Developed custom AI agents to automate Figma-to-code scaffolding, significantly reducing manual UI development time.
- Applied AI-assisted development techniques to improve frontend development workflows and ensure code consistency across large-scale projects.

PROFESSIONAL EXPERIENCE

Associate - Cognizant Ltd, Chennai

April 2025 – Present

Project: Abbvie Intake Portal (Architect & Lead Developer)

- Architected the end-to-end development of a dynamic intake portal from scratch using Angular 19/20, strategically utilizing both standalone components and traditional modular architecture to optimize lazy-loading and bundle performance.
- Engineered complex multi-step workflows utilizing Reactive Forms with nested controls, conditional validations, and dynamic field rendering to ensure seamless, unified state management across multiple pages.

- Implemented dynamic internationalization (i18n) across the application using ngx-translate, allowing instant toggling between multiple languages without degrading performance.
- Developed secure and responsive user intake workflows featuring concurrent file uploads and integrated Google reCAPTCHA validation for robust bot protection.
- Integrated Angular Material for cross-platform visual consistency and utilized AG Grid to efficiently handle and render large datasets with custom sorting, filtering, and pagination logic.

Project: PYME - Payroll Manual Entry (Modernization Specialist)

- Modernized legacy codebase by migrating from Angular 9 to Angular 19, significantly improving performance and long-term scalability.
- Developed new application screens and implemented end-to-end CRUD operations for streamlined payroll management using reusable Angular services and custom UI components.

Technology Analyst - Infosys Ltd, Chennai

May 2022 – April 2025

Project: Hershey's B2B (Angular Specialist)

- Engineered responsive UI features and B2B workflows (registration, cart, product search) from Figma designs utilizing SAP Spartacus Composable Storefront and Angular 17.
- Integrated RESTful APIs utilizing RxJS Observables and Angular Material components to deliver seamless data binding and presentation.
- Ensured robust code quality and application stability by developing comprehensive unit test cases using Jasmine and Karma.

Project: Apple Inc (Full-Stack Frontend Developer)

- Developed and maintained interactive, responsive web applications utilizing Angular, TypeScript, HTML5, CSS3, and Bootstrap.
- Collaborated on full-stack feature delivery by developing and integrating RESTful backend APIs utilizing Java Spring and MongoDB.
- Facilitated seamless application deployments and monitored services utilizing Rio and Spinnaker CI/CD pipelines.

System Engineer - Tata Consultancy Services, Chennai

Jan 2020 – May 2022

Project: Nielsen IQ (Frontend Migration & Optimization)

- Implemented the migration of legacy web applications to modern Angular frameworks, significantly reducing page load times through lazy loading and performance optimization.
- Managed complex asynchronous data streams utilizing advanced RxJS operators, enabling seamless front-to-back connectivity.
- Engineered custom pipes, directives, and secure routing architectures using Angular Route Guards and HTTP Interceptors for strict authentication control.

TECHNICAL SKILLS

Frontend: TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, SASS, Bootstrap, Responsive Design.

Angular Ecosystem: Angular (v8-20), RxJS, Reactive Forms, Standalone Components, SAP Spartacus, Angular Material, AG Grid, ngx-translate.

Enterprise / Integration: Java, Spring Boot, RESTful APIs, MongoDB Compass, Authentication/Authorization (OAuth2).

Testing: Jasmine, Karma, Unit Testing.

DevOps / Deployment / Monitoring: Rio, Spinnaker, Splunk, CI/CD Pipelines, SAP Commerce Cloud.

Version Control: GitHub, Bitbucket, Microsoft Azure DevOps.

AI / Productivity: Figma-to-Code Automation, AI-Assisted Scaffolding.

AWARDS & CERTIFICATIONS

- Infosys INSTA Award (Feb 2025) – Recognition for outstanding project contributions.
- Infosys Certified Angular Developer & Frontend Web Developer
- HackerRank Certifications: Angular Developer (Intermediate), React Basic, CSS Basic
